

Marker size test

Tape where the ARM will be, then run: `python vision.py --size-test`

id 10 30 mm

id 11 25 mm

id 12 20 mm

100 mm - MEASURE THIS between the tall end ticks before cutting any marker.

If it is not 100.0 mm, reprint at 100% scale ('Actual size', not 'Fit to page').
